S&P® DOW JONES INDICES

The “S&P 500®” and “S&P 500 IQ 0.5% Decrement Index” (“S&P 500 IQ Index” or the “Index”) are products of S&P Dow Jones Indices LLC or its affiliates (“SPDJI”) and have been licensed for use by Amerigo Financial Life and Annuity Insurance Company. S&P®, S&P 500®, US 500, The 500, iBoxx®, iTraxx® and CDX® are trademarks of S&P Global, Inc. or its affiliates (“S&P”); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”). Amerigo’s Fixed Indexed Annuities are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P 500® and S&P 500 IQ Index.

MORGAN STANLEY ENHANCED ALLOCATION INDEX

Any annuity product that is linked to the performance of the Index is not sponsored, endorsed, sold or promoted by Morgan Stanley & Co. LLC, or any of its affiliates (collectively, “Morgan Stanley”). Neither Morgan Stanley nor any other party (including without limitation any calculation agents or data providers) makes any representation or warranty, express or implied, regarding the advisability of purchasing this product. In no event shall Morgan Stanley have any liability for any special, punitive, indirect or consequential damages including lost profits, even if notified of the possibility of such damages. The Index is the exclusive property of Morgan Stanley. Morgan Stanley and the Index are service marks of Morgan Stanley and have been licensed for use for certain purposes. Neither Morgan Stanley nor any other party has or will have any obligation or liability to owners of this product in connection with the administration or marketing of this product, and neither Morgan Stanley nor any other party guarantees the accuracy and/or the completeness of the Index or any data included therein.

Morgan Stanley includes an index deduction mechanism that scales upward based on positive recent performance of the Index, up to a maximum of 0.15% per business day or up to approximately 37.8% per year. Such deduction is included in calculating the level of the Index and will thus reduce the return of the Index. The excess return calculation applied by Morgan Stanley as part of the Index’s methodology will also decrease the Index’s performance and thus reduce the return of any product linked directly to the Index.

SG GLOBAL BALANCED INDEX

The Global Balanced Index (“Index”) is the exclusive property of SG Americas Securities, LLC (together with its affiliates, “SG”). SG has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) (“S&P”) to maintain and calculate the Index. “SG Americas Securities, LLC”, “SGAS”, “Société Générale”, “SG”, “Global Balanced Index”, et al. (collectively, the “SG Marks”) are trademarks or service marks of SG. SG has licensed use of the Index and the SG Marks to Amerigo Financial Life and Annuity Insurance Company (“Amerigo”) for use in fixed indexed annuities. Neither SG, S&P, nor any other third-party licensor has been authorized to act as an agent of Amerigo or has in any way sponsored, endorsed, sold, promoted, structured or priced any fixed indexed annuity or provided investment advice to Amerigo. Such parties make no representation regarding the advisability of purchasing, selling, or holding product linked to the Index, including Fixed Indexed Annuities and shall not be liable for any related loss or payment thereof. Obligations to make payments under the Fixed Indexed Annuities are solely the obligation of Amerigo. Neither Amerigo nor SG are obligated to invest annuity payments in the components of the Index. The Index levels are net of a 0.50% annual maintenance fee, calculated and deducted daily. The Index also deducts fees to cover rebalancing, replication, and other costs. The total amount of these fees is unpredictable and depends on a number of factors, including the leverage of the Index, which may be as high as 200%. These fees and costs, which are increased by the Index’s leverage, will reduce the potential positive change in the Index and increase the potential negative change in the Index. While the volatility control applied by the Index may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return as compared to products not subject to volatility controls.
